## DETAILED ACTION

### *Specification*

1. **The title of the invention is not descriptive.** A new title is required that is clearly indicative of the invention to which the claims are directed.

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Iwata (US Pat. 6,374,511).

Regarding claims 1 and 2, like claim invention, Iwata discloses an apparatus for activating an ionizable product comprising:

means (3) for generating a magnetic field; wherein the means such as magnet inherently having one of its poles directed toward the means for applying plasma particles; and

means for applying plasma particles (Eair) by corona discharge unit (4) to the ionizable product (2) place on the means (3) for generating the magnet field.

Regarding claim 7, Iwata further discloses the means (3) for generating magnetic field is movable relative to the means (4,5) for applying the plasma particles)

Art Unit: 2821

***Allowable Subject Matter***

4. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior fails to establish permanent magnets and magnetically permeable plates between which the permanent magnets are inserted as required in claim 3.
